

RasSiya - the Most Ancient Civilization and the Serbian Miracle Workers by MITROVIC Bozidar, Doctor of Juridical Science, the **miniature book, souvenir, book, and DVD** contain unique scientific discoveries that are a worldwide sensation.

In the books and souvenir, **MITROVIC Bozidar** clarifies that:

1. The ethnonym **SlaVs** originated from an incorrect reading of the name **KoloVeni** written in the AzBuka (alphabet) of the Etruscan period;
2. The ethnonym **KoloVeni** has its origins in ancient times, when names arose according to the ideas and faith (veRa) of the **SlaVs (SlaVeni /KoloVeni)** of those times. In Serbian, Russian and other Slavic languages:
 - ✓ **Kolo** meant, and still means, the **yearly cycle** of the **Sun's** apparent **motion (circle)**,
 - ✓ **Veni** meant, and still means, **wreath/vine (venets)**, i.e., **kin**.
3. The true name of the **SlaVs** ← **SlaVeni** ← **KoloVeni** has been preserved to our time on the Gold Tablet from Pyrgi (6th century B.C.), now kept in the Etruscan Museum of Villa Giulia in Rome.
In the Etruscan period of the **KoloVenic (SlaVic)** phonetic AzBuka (one symbol denoted one sound), the word **EtRuscan ethnonym KoloVeni (SlaVs)** was written from right to left as **two words**:

KoloVeni
 8 7 6 5 4 3 1 1 2 3 4 5 6 7 8

True meaning: **Kolo** = **Sun's** yearly cycle; **venets** = **vine, kin** **Sun's kin**

First level of changes - incorrect reading of the **SlaVenic (KoloVenic)** words written in the AzBuka of the Etruscan period:

SloVeni **SLAVyane** → **SLAVs**
 1 3 4 5 6 7 8 1 3 4 5 6 7 8 1 3 4 5 -

4. The meaning and origin of the word **Russia (RASiYa)**:
 - ✓ **R** - **rod** [people] + **Az** - **initial, original, first** + **siya-et** [**shines**], which meant
 - ✓ **Ras**, which signified **Kolo** and the **spiritual reflection** of the **Sun** in its yearly motion - **siyane** [radiance, light], which brings forth **life-vine [venets]** on Earth, so that the word **RosSiya (RusSia)**, or **RasSiya** as the wise Russian people correctly pronounce it, is a synonym of the word **KoloVenia**.
5. For the ancient **SlaVs /KoloVeni**, the **yearly cycle** of the **Sun's** motion was the monotheistic deity **Kolo** in the aspect of:

- ✓ **Svyato(Holy)Vid** in **four** appearances, who was also
 - ✓ **triGlav (threeHeads)**, since the spring and autumn equinoxes pass through the same ecliptic.
6. In 509 B.C., when the Latins (Ranni) overthrew the last Etruscan **czars (czAR)** in the Apennines in a military coup, or the so-called Roman revolution, and banned the ancient religious (**Azichesky/Yazychesky/AzBukan**) symbol , meaning **Ras** - the **Sun/Kolo, which shines**, in its yearly cycle; the symbol has been found at the archaeological site of Lepenski Vir (8000 B.C.) in Serbia, which right up to the Middle Ages was called **Rashka/Raska** = **RasS-A/ RusSIA** = **Russkaya**.
 8. The ancient name of Switzerland - **HelVetia** was the Latinized form of the name **KoloVenia /KoloVetia**, which was and still is a synonym of the word **RasSiya**, as evidenced by old maps of Europe, which up to the Middle Ages gave the name of this territory as **Ruthenia** = **Ratia** = **Ratsia (RasSiya = Russia)**.
 9. The names of many peoples who are not considered **Slavs** by language today were derived from **KoloVeni /KoloVedi /SlaVeni /SlaVs**:
 - ✓ **XelVeti [Helveti - Helvetians]** and the word **XEleni [HEleni - Hellenes]**, because **Kolo**, as the yearly cycle of the Sun's apparent motion, with two solstices and two equinoxes, was denoted by the ideograph **X**, so that the word **Xellos [Helios]** implies not only the **Sun**, but also **Kolo** as the yearly **solar cycle**.
 - ✓ **Svedl [Swedes]**, **Scot/Shot** = **Kolo/ScotLand** because the ideograph connecting **Kolo** and the summer and winter solstices was mistakenly read as a phonetic symbol - the Latin letter **S**, and so on.
 10. The word **Cyrillic** (alphabet) did not originate from the name Cyril (brother of Methodius) but from the ceremonial form of the AzBuka - **Kurilic**.
 11. The word **Rome** (built by the descendants of **VAeneas [Aeneas]**), and later **Romania**, were incorrectly read from the symbol and name **RAz (RAΣ → RVM [Ruma, Rom, Roma]**, since the AzBuka letter A was incorrectly read as the Latin letter V/rotated and the AzBuka letter Σ was incorrectly read as the Latin letter M)), which denoted **RasSiya** of the **Etruscan** period.
 12. The names **CretA** (Crete), **Cjuew** (Kiev), **DioCleA (DiVineCleA - Doclea)**, **Holland**, and **MosKoV-IA (Moscow)** were erroneously read from the name **KoloVenia (KoloVen-a: country of the KoloVeni/SlaVs)**, because the glossators transliterated the AzBuka name **KoloVeniA**:
 - ✓ into the Latin words **co viria**, which came to be interpreted as **curia** (a society of people or a gathering of men),
 - ✓ without understanding the worldview of the ancient **Slavs/KoloVeni**,

MITROVIC Bozidar presents a great deal of other evidence leading to the irrefutable conclusion that Roman law originated in **EtRuscan** law, which is why the fundamental concepts of Roman law have a logical explanation only in the Serbian and Russian languages:

- a) **Iustitia** (justice: written as **justicija** in Serbian, and **justitsiya** in Russian) and **Ius** (law) are derived from the **KoloVenic (SlaVic)** word **ustit/pleadings**, since judging from the extant versions of the Law of the Twelve Tables as the first and oldest Roman law code, it lacked the present-day scope of **subjective law (Ius)** as a single whole, consisting of:
 - ✓ **authority**, and
 - ✓ a **claim** that is made if this authority is not executed;
- b) **Ius (subjective law: jus** in Serbian; **yus** in Russian) at this stage of development of the law was defined as the possibility of obtaining **justice** through **oral pleadings [ustenyas]** by pronouncing the divine form of the claim through which this subjective law was exercised;
- c) **KoDeux** - the Latinized form of the **KoloVenic wooden idols (koloDukh → CoDex)** on which the **KoloVeni/SlaVs** inscribed their fundamental principles, because the ancient **SlaVs/KoloVeni** believed that **All is Kolo**, and the Sun, its motion, nature and mankind are a single whole, so that the god **Kolo** materialized in a cross section of a tree trunk as **annual rings [godichnye koltsa]**, which they used to define a year [**god**] as a unit of time. This was the origin of the name adopted by some of the new Western peoples for their deity - **God/Gott**.

RasSiya (Russia) - the Most Ancient Civilization and the Serbian Miracle Workers, miniature book and souvenir (40 circles); 448 pages, Supplement 4+4 full color 16 pg.; Hardcover; Format 75 mm x 68 mm; Print edition 1,000

RasSiya (Russia) - the Most Ancient Civilization and the Serbian Miracle Workers full text - large book 480 pages, full color 4+4; Hardcover; Album format 30 cm x 30 cm

Buy the miniature book at Dom Knigi on Novy Arbat in Moscow (in ancient times **MosKoV-ia/ KoloVenia**).

The books are dedicated to my son

Milos Mitrovic,

Graduate of the Faculty of Computational Mathematics and Cybernetics of Moscow State University
«M.V. Lomonosov»

(11.01.1983 Belgrade - 07.06.2006 Moscow)
